

# V TYPE – AIR FILTERS

<b>Features</b>	This type air filters are made up of special super-fine polypropylene fiber and glass fiber. Which has large filter area, lower pressure drop and long service life	
<b>Filter media</b>	Super-fine polypropylene fiber and glass fiber.	
<b>Separator</b>	Hot melt glue	
<b>Seal glue</b>	Polyurethane	
<b>Outer frame</b>	ABS or galvanization-steel plate	
<b>Working tem.</b>	-20°C-80°C	
<b>Humidity</b>	≤80%	
<b>Efficiency</b>	F6-F9(EN779:2002)	
<b>Application</b>	Used in the large air flow systems of Pharmacy, foodstuff, hospital, dust proof room etc, the filters can be used as the end filtering for HEPA system or front-end filtering for the UH systems.	

Nominal size(") W*H*D	Width (mm)	Height (mm)	Depth (mm)	Media Area (m <sup>2</sup> )	Airflow and pressure drop (m <sup>3</sup> /h & pa)			Efficiency
